WORK EXPERIENCE

React developer
Sparklab

09/2022 - Present   *Tirana*

Achievements/Tasks

- Proficiency in React: A strong understanding of React fundamentals, including components, props, state, and lifecycle methods.
- Proficient in implementing APIs using Axios, including handling data and error responses, creating custom headers, and managing authentication tokens.
- Familiarity with Redux: Knowledge of Redux and its role in managing application state.
- Experience with Git: Familiarity with Git version control and its workflows, including branching, merging, and pull requests.
- Proficient in using React hooks such as useState, useEffect, useContext, useReducer, useCallback, useMemo, useRef, and custom hooks to manage state, side effects, and logic in functional components.

Salesforce Administrator
Sparklab

04/2022 - Present   *Tirana*

Achievements/Tasks

- Data Management: Ensuring data accuracy, completeness, and consistency by managing data quality, performing data imports and exports, and creating reports and dashboards.
- Security and Access Management: Managing security and access settings to ensure that users have the appropriate level of access to data and functionality.
- Workflow Automation: Creating and managing workflow rules, process builder, and flow to automate business processes and increase productivity.
- Customization: Creating and customizing Salesforce objects, fields, page layouts, and record types to meet business needs.
- Successfully implemented various third-party apps from Salesforce AppExchange to enhance the functionality of the Salesforce instance.
